DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to a retroviral particle that is pseudotyped with VSV G protein.

Group II, claim(s) 2- 8, drawn to a tumor specific retroviral expression vector.

Group III, claim(s) 9, drawn to a plasmid.

Group IV, claim(s) 10- 12, drawn to a replication defective retroviral expression vector.

Group V, claim(s) 13, drawn to a method of treating a tumor.

Group VI, claim(s) 14, drawn to a method of detecting a genetically modified cell.

Group VII, claim(s) 15, drawn to a method to make a retroviral particle.

Group VIII, claim(s) 16, drawn to a method to make a retroviral particle.

Group IX, claim(s) 17, drawn to a cell line.

The inventions listed as Groups I- IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1648

Group I is directed to a retroviral particle that is pseudotyped with VSV G protein, which is the first product. Ory *et al.* teach a retroviral vector that is pseudotyped with VSV-G. Therefore, no special technical feature exists for Group I as defined by PCT Rule 13.2 because claim 1 does not define a contribution over the prior art. The technical features of Groups II-IX are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, and because the technical features of the Group II-IX inventions are not present in the Group I claims, unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that a rejoinder of claims is possible at a later date if the product is eventually found patentable. Guidance on treatment of product and process

Art Unit: 1648

claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. §103(b) is set forth in the Commissioner's Notice of February 28, 1996 published on March 26, 1996 at 1184 O.G. 86.

To facilitate examination under § 103, where product and process claims are presented in the same application, applicant may be called upon under 35 U.S.C. § 121 to elect claims to either the product or process. The claims to the non-elected invention will be withdrawn from further consideration. However, in the case of an elected product claim, rejoinder will be permitted when a product claim is found allowable and the withdrawn process claim depends from or otherwise includes all the limitations of an allowed product claim. Withdrawn process claims not commensurate in scope with an allowed product claim will not be rejoined. In the event of rejoinder, the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104 - 1.106. If the application containing the rejoined claims is not in condition for allowance, the subsequent Office action may be made final, or, if the application was already under final rejection, the next Office action may be an advisory action.
